## Product Descriptions

### NRG Immune Enhancement System – Base Unit

The NRG Immune Enhancement System includes everything you need to start providing your patients with a healthy quality of life. The system comes complete with the hardware (DCM, Energy Processor, Corrective Laser, wires harness, finger clip, laptop computer and power cords), and the NRG software CD containing the proprietary database of over 100,000 substances for testing and adjustment. This system provides everything you need to help your patients maintain a healthy immune system to help correct and prevent symptoms and conditions such as:

Allergies (complete)	Autism	ADD/ADHD	Frequent Colds
Digestive Issues (IBS/Acid Reflux)	Bloating	Nausea	Asthma
Cell/Organ Contamination	Toxins	Headaches	Lack of Focus
Insomnia	Sinusitis	Rashes	Psoriasis
Eczema	Itchy/Watery Eyes	Lack of energy	<i>and more!</i>

### Pain Management / Migraine Add-on Module

This add-on software module includes easy-to-use protocols and additional substances to allow for the successful clearing of pain-related conditions and illnesses including migraines, fibromyalgia, muscle pain, and more.

### BAKS 3000 Advanced Protocol Add-on Module

This add-on software module offers a different treatment approach compared to other NRG modules providing additional options for advanced clinical cases or minority cases that may not be responding to normal NRG protocols.

### Emotional/Psychological Add-on Module

This add-on software module includes easy-to-use protocols and additional substances designed specifically to address the emotional, psychological and mental disorders such as depression, antisocial behavior, addiction, anger and aggression. The protocols focus on healing the body's reaction toward specific foods and food substances as well as hormones.

### Diet / Weight Loss Add-on Module

This add-on software module includes easy-to-use protocols and additional substances designed specifically to correct issues related to inappropriate reactions toward foods, food components, thyroid, metabolic and digestive issues. The use of these protocols will allow your patients, in conjunction with a balanced diet and exercise, the ability to maximize their weight loss efforts.

### Quit Smoking Add-on Module

This add-on software module includes easy-to-use protocols and additional substances designed specifically to address the body's specific response toward nicotine as well as the emotional and psychological response related to addiction. The use of these protocols will help you patients achieve the ability to kick the habit for good.

### Dental Add-on Module

This add-on software module includes easy-to-use protocols and additional substances designed specifically to address dental issues including dental and gum disease material compatibilities and heavy metal issues with gold, amalgams and other metals.

### Veterinary Add-on Module

This add-on software module includes easy-to-use protocols and additional substances that represent the diseases, vaccinations, medications, and other items that pass through an animal clinic or are used by a veterinarian that can cause complications for animals.
